The average length of public school term for the whole country in 1913 was 158.1 days. In 1 State the schools were open for an average of 194.3 days, and in another only 91.1 days. In 5 States the terms exceeded 180 days. In 23 States the average term fell below 160 days, and in 15 of these States it was below 140. Only 2 States fell below 120 days in average length of school term. The average number of days' attendance for every child 5 to 18 years of age (i. e., 5 to 17 years, inclusive) was 84.1 for the whole country, varying from 41.3 in the State with the lowest average to 111.9 in the State having the highest.

Assuming that the percentage of enrollment, average attendance, and length of school term computed for 1913 may continue for 13 years (the period of school life 5 to 18), the average amount of schooling for each individual in this group would be 1,093 days, or 5.47 years. The above table compares this estimate with similar estimates for former years. If the estimate for the private schools be added to the above, the average number of days' schooling is brought up to 1,195, or 5.98 years of 200 days each, as shown in Table 4.

The census enumerators of 1910 reported the approximate number of children in school from each of seven age groups. Applying the same percentages to the enrollment reported to the Bureau of Education for 1913, a similar age distribution is obtained, as shown in Table 5.

The total enrollment of 20,792,879 for 1913 was distributed as follows: 19,064,787 in elementary schools; 1,366,822 in high schools, academies, and preparatory schools; and 361,270 in higher institutions, as already shown in Table 2. To obtain a fair estimate of the number in each grade, we use the approximate percentages given in Chapter I for elementary schools and the actual percentages ascertained for secondary or high schools. The result is given in Table 6.

It is probable that the distribution of enrollment in the elementary grades has preserved practically the same ratio for the past eight years as shown in the above table. Using these approximate percentages, it is found that in 1905 the first grade had 4,023,026 pupils, that 2,307,248 were in the fourth grade in 1908, and 1,181,892 were enrolled in the eighth grade in 1912, while 560,397 were found in the high school in 1913. This progress in grade enrollment is shown in Table 7.

It is usually estimated that the beginners make up about one-half of the first-grade enrollment, while repeaters or retarded pupils comprise the other half. If this be true, the beginners in the year 1904-5 must have numbered about 2,000,000. The enrollment of students in the first year of the high school in 1912-13 was about 28 per cent of this number.

About 39 per cent of the 560,397 students in the high school in 1913 may be expected to graduate in 1916, approximately 218,555. This estimate is based upon Table 8, which shows the enrollment of first-year high-school students for four successive years and the number of graduates for four years later.

These figures indicate that about 109 in every 1,000 pupils entering the first grade in 1904-5 will graduate from the high school in 1916. The number of students annually completing four-year college courses and receiving first degrees is about 26,000. In 1920 the number will exceed 27,000, or nearly 14 for every 1,000 entering the first grade in 1904-5.

Table 9 shows that the estimated cost of education in the United States for the year 1913 was \$748,736,864. The expenditures for State school systems, for all public institutions, and for institutions of higher education, are reported with reasonable accuracy. For the remaining groups estimates were necessary.

Periodically for more than 40 years the Bureau of Education has presented tabular summaries showing the amounts of gifts and bequests to education. The last of these summaries appeared in the introductory pages to the second volume of the Education Report for 1911, bringing the statistics up to 1910. The four years since the latter date are covered by the summaries given in Table 11.

KINDERGARTEN STATISTICS FOR 1914.

Tables 13 and 14 are summaries of figures pertaining to kindergartens in the United States for the school year 1913-14, compiled by the Kindergarten Division of the Bureau of Education. The statistics give evidence of wholesome, steady growth.

Making due allowance for the fact that it has been possible to secure more nearly complete data for 1914 than for 1912, still it is manifest that not only in large cities have the numbers increased, but that also in villages, especially where community ideals are high, classes are being organized and maintained. This fact seems to

indicate that a small population is no obstacle to the establishment of a public-school kindergarten.

In 1914, reports of public-school kindergartens were received from 1,135 cities, as compared with 867 cities in 1912. The number of children enrolled was 391,143, as against 311,970 in 1912. Of kindergartens other than public, 1,571 reported to the bureau, as compared with 994 in 1912, and the enrollment was 74,725, as against 52,219 in 1912. The total number of children enrolled in both public and other than public kindergartens according to 1914 reports was 465,868, as compared with 364,189 reported in 1912. Thus the total gain in the number of children enrolled is 101,679.

A study of the geographical distribution of kindergartens reveals the fact that the most noticeable gains have been made in the North Central, South Central, and Western Divisions. In the North Central Division 635 cities report public kindergartens in 1914, whereas 454 cities reported in 1912. The South Central Division shows 62 cities, as compared with 32; and the Western Division 62 cities, as compared with 49 in 1912.

The States which show marked increase in kindergarten enrollment in their respective divisions are: Illinois, Michigan, Wisconsin, Minnesota, Iowa, Nebraska, and Kansas in the North Central; Alabama, Louisiana, Texas, Arkansas, and Oklahoma in the South Central Division; New Mexico, Arizona, and California in the Western Division.

WEALTH, TAXATION, AND SCHOOL EXPENDITURE.

Tables 15 and 16 show the relation of school expenditure to assessed valuation of property at four different periods. The figures showing for each State the assessed valuation of all property subject to ad valorem taxation are taken from recent special reports of the Bureau of the Census. The statistics of expenditure for public schools are from annual reports published by the Bureau of Education.

Taking the United States as a whole, it appears that in 1880 the expenditure for public schools was 45.6 cents on each \$100 of assessed valuation of all property, in 1890 the average had increased to 55.2 cents, in 1902 to 66.6 cents, and in 1912 to 69.5 cents.

An inspection of the last column of Table 16 will show wide variation between the States in the matter of school expenditure. This variation is more apparent than real, when the difference in bases of taxation are considered. For example, it is shown that Nebraska expends for public schools 189 cents on every \$100 of assessed valuation, while Rhode Island expends only 38.8 cents. In Nebraska the basis of taxation fixed by law is 20 per cent of the actual value of all property subject to ad valorem taxation, while the Rhode Island law provides for 100 per cent valuation.

In at least 40 States the statutes provide that property shall be assessed at its actual value; yet in a majority of these States the law is not rigidly enforced. It may be said, however, that in most of the States assessed valuation is now nearer the true value than 10 and 20 years ago. In 1890 the estimated true value of property was about two and one-half times the assessed value, and in 1900 the assessed value was hardly 50 per cent of the estimated true value. It is believed that in 1912 property was assessed at about 60 per cent of its real value, taking the country as a whole.

In a few of the States the law distinctly permits the assessment of property for taxes at less than its actual value. Idaho provides for a 40 per cent assessment, Illinois 33.3 per cent, Iowa 25 per cent, and Nebraska 20 per cent.

The Bureau of the Census published estimates of the true valuation of real and personal property for 1880, 1890, 1900, and 1904, giving the figures by States. Similar estimates in connection with the wealth, debt, and taxation investigation of 1912-13 are not available as the Education Report goes to press.

Table 17 shows the levies of ad valorem taxes in all the States in 1912. The amounts levied for schools by the State, by the county, and by other civil divisions are shown in comparison with the levies for other purposes. It appears that for the whole country the school levy was 28.67 per cent of the total levy. The highest percentage was shown by Utah, 46.33 per cent, and the lowest by New Jersey, 11.85.

CHAPTER I.

STATE COMMON-SCHOOL SYSTEMS, 1912-13.

The State common-school system, as the term is here used, embraces the public elementary and high schools maintained by State and local taxation, including city and village systems.

The slow process of collecting common-school returns from county superintendents and other local officials makes it impossible for many State superintendents of public instruction to send consolidated reports to the Bureau of Education within the first six months after the close of the school year. In a few States the school statistics are frequently more than a year old before they are ready for publication.

It would be possible to print in this annual report statistics for the year 1914 from about one-half the State school systems. It would then be necessary to complete the tables by using the 1913 statistics from the other half. Such tables have been found very unsatisfactory. Statistics one year delayed, if complete for the year, are far more useful.

The statistics for State common schools presented in this chapter are for the school year ended June, 1913. The other chapters of this volume include reports from educational institutions one year later. The statistics of public high schools reported directly to the Bureau of Education and printed in Chapter VIII, as well as the reports from city superintendents printed in Chapter II, are for the year ended June, 1914.

As the school census age is not the same in all the States, it is necessary to use a uniform age period for purposes of comparison. For many years the bureau has compared the reports of enrollment and attendance with the estimated number of children from 5 to 18 years of age (i. e., 5 to 17, inclusive). This estimate is made annually, using the Census Office estimates of total population and the percentage of 5 to 17 population at the last census.

The estimated population of 5 to 18 (5 to 17 inclusive), for 1913, was 25,587,331, as shown in the above synopsis. The estimate by States is given in Table 2. It is probable that the estimate of school population is somewhat in excess of the true number of children of school age, owing to a supposed relative decrease in the ratio of children to adult population. This decrease is partly due to the addition of an increasing number of foreign-born adults to our population, but is mainly due to the decreasing birth rate. The following table shows the ratios for five decennial years:

Number of children 5 to 18 years of age (5 to 17, inclusive) to every 100 persons of the total population.

The number of children of each age can not be closely estimated at this time, but the approximate distribution by certain age groups, most useful for comparative purposes in school statistics, is given in the following table:

In 1910 the Census Bureau defined as rural all the population outside of cities and towns of 2,500 inhabitants and over. At that time the rural population was 53.7 per cent of the total population. Using the percentages ascertained for that year, the distribution of urban and rural population for 1913 was approximately as shown in the following table:

Estimated population per square mile, and urban and rural population, 1913.

While about 54 per cent of the total population is rural, nearly 60 per cent of the school population will be found in rural communities. The exact distribution for the 5 to 17 age group can not be given, but that for the 6 to 20 group was ascertained in 1910. Using the same ratios, the apportionment of the like population in 1913 was approximately as shown in the following table:

Only about one-third of the States report enrollment by grades. It is somewhat hazardous to base an estimate of grade enrollment for all the States upon these returns, but such an attempt is made for elementary enrollment in the table on the following page. The table at the bottom of the same page showing high-school enrollment is not an estimate. It shows the actual enrollment by grades, or years, in the public high schools as reported directly to the Bureau of Education for the school year ended June, 1913.

CHAPTER II.

STATISTICS OF CITY SCHOOL SYSTEMS, 1913-14.

The cities of 5,000 population and over numbered 1,233 at the last census. These cities have 1,243 systems of public schools, 10 of the cities having dual systems.

In 1911 the Bureau of Education began the collection of statistics of city school systems on enlarged schedules, differing materially from those used in former years. The results of the fourth inquiry, that for 1914, are presented in this chapter.

The inquiry is in two parts, printed on separate sheets. The first relates to the teaching force, enrollment, attendance, and all school statistics other than fiscal; the second part covers receipts and expenditures and value of school property. In 1911 there were 253 of the 1,243 city school systems failing to make a report on part one, and 356 making no report on part two. For 1912 there were 136 systems failing to report statistics of school attendance, and 219 making no fiscal returns. In 1913 there were 86 city systems delinquent as to attendance statistics, and 204 giving no items of receipts and expenditures. The most persistent effort ever made by the bureau to collect statistics of city school systems was made in 1914, with far from satisfactory results. In the detail tables the attendance statistics of 119 systems are not reported, and the fiscal statistics of 215 systems do not appear.

It was most desirable that for 1914 a compact presentation of the combined statistics of all the 1,243 city school systems should be presented. To do this it was necessary to make careful estimates for the cities not reporting. Such estimates are included in the summary Tables 1 to 7.

It will be noted that the cities are arranged in four groups. All cities having 100,000 population and over in 1910 are in the first group, and all below 100,000, but having 25,000 or over, are in the second group. The third group includes all cities of 10,000 population and over, but below the second group; while the fourth group includes the remaining cities down to 5,000 population.

The statistics of the separate groups are summarized in Tables 3 and 5, while the statistics of the four groups are combined in Tables 4 and 6. The 1,243 systems had a combined enrollment of 6,708,198 pupils, and an average attendance of 5,282,514. For

these pupils there were 174,600 teachers and 12,388 supervising officers. The running expenses of the systems amounted to \$224,-820,120, while new buildings, sites, equipment, etc., added \$56,-454,284, making with other payments the aggregate expenditure \$312,971,814. The salaries of teachers, principals, and supervisors included in the above amounted to \$163,894,145.

About 42 per cent of the population of the United States will be found in the cities of 5,000 population and over. These cities have about 36 per cent of the school enrollment of the State school systems and 39 per cent of the average daily attendance. Of the public school teachers, 33 per cent will be found teaching in these cities and they receive about 54 per cent of the salaries paid to teachers. The running expenses of these city systems amount to about 68 per cent of such expenses for State systems, and their outlays for buildings, sites, equipment, etc., reach 51 per cent. The total expenditure for public schools in these cities of 5,000 population and over amounts to 60 per cent of the aggregate expenditure of the State systems in which they are included. Of course the school year is considerably longer in the cities.

The chief value of the tables presenting statistics of city school systems in detail is in the opportunity afforded of studying the systems in groups of any size, or in any section of the country. For example, the student of education in a city of 25,000 population may wish to compare his system with a number of others of nearly the same population in any part of the country. He will select his list of cities and the desired items from the general tables presented in this chapter, preparing brief summaries similar to Tables 3 and 5, or all tabulated items of the selected group may be summarized, following the scheme applied to Groups I, II, and III in Table 1, which begins on the next page.

In Tables 1, 5, 12, 13, and 14 the term "Other payments" covers redemption of bonds, redemption of short-term loans, payments of warrants and orders of preceding year, payments of sinking funds, payments of interest, miscellaneous payments, including payments to trust funds, textbooks to be sold to pupils, etc.

CHAPTER III.

UNIVERSITIES, COLLEGES, AND TECHNOLOGICAL SCHOOLS.

The tabulated reports of universities, colleges, and technological schools for 1913-14 are based upon returns from 567 institutions, as compared with 596 institutions for 1912-13. States or municipalities control 93 of these institutions, and 474 are controlled by private corporations. A few colleges have each year failed to report, and when this occurs for two years in succession their names are dropped from the tabulated lists. Others, like Fredericksburg College, Virginia, cease to exist, or merge with other institutions, as in the case of Charles City College with Morningside College, Iowa. Additions to the tabulated list include those institutions from which reports are received after the lapse of two years and those which give evidence of reaching satisfactory standards of work. The names of the institutions thus dropped or added will be found in the following list:

CHANGES IN TABULATED LIST OF COLLEGES.

Colleges (11) tabulated in 1914, but not in 1913.—Andrew College, Georgia; De Paul University, Illinois; Indiana Central University; College of St. Teresa, Minnesota; College of St. Elizabeth, New Jersey; Bluffton College and St. John's University, Ohio; Rice Institute, Texas; St. Michael's College, Vermont; Campion College and St. Clara College and Academy, Wisconsin.

Colleges (38) not tabulated in 1914, but tabulated in 1913.—Arkansas College; Colorado Woman's College; Southern College, Florida; Morehouse College and Southern Female College, Georgia; St. Stanislaus College¹ and Lincoln College, Illinois; Valparaiso University, Indiana; Charles City College,² Iowa; Kansas City University, Kansas; McLean College³ and Sayre College, Kentucky; Jefferson College, Louisiana; Port Gibson College, Mississippi; Howard Payne College, Lexington College for Young Women, Liberty Ladies College, and Cottey College, Missouri; St. John's College, New York; Queens College and Lenoir College, North Carolina; Ohio Northern University; Henry Kendall College, Oklahoma; Dallas College, Oregon; Beaver College and Blairsville College,³ Pennsylvania; Allen University (colored) and Coker College, South Carolina; Sullins College, Howard College, Cumberland University, Bethel College, and Synodical Female College, Tennessee; Asgard College,³ Texas; Roanoke College of Danville and Fredericksburg College,³ Virginia; Spokane College, Washington; Powhatan College,³ West Virginia.

There were 216,493 students in the collegiate and resident graduate departments of universities, colleges, and technological schools. The number of such students for each year since 1889-90 is shown in the following table.

¹ Transferred to list of secondary schools.

CHAPTER IV.

AGRICULTURAL AND MECHANICAL COLLEGES.

[The institutions commonly known as "agricultural and mechanical colleges" or "land-grant colleges" are brought together in this chapter and made the subject of special treatment. In addition to being considered here they are included in the general tables of the different classes of schools in other parts of this report and in the special bulletin on State-aided institutions, the dominating character of each institution determining whether it shall be classed among the universities and colleges or as a normal or secondary school. Those for colored students do not appear in the bulletin on State-aided institutions, but do appear a third time in the tables of colored schools. In a few States the agricultural and mechanical college forms a part of the State university, and in such cases the figures given in the statistical tables apply to the entire institution.]

LAND-GRANT ACTS.

The acts providing support for these institutions are four in number:

- (1) The act of July 2, 1862, granting public lands to the States.
- (2) The act of March 3, 1883, amending the previous act and providing for the investment of the principal.
- (3) The act of August 30, 1890, making a yearly appropriation to the States and Territories in aid of colleges of agriculture and the mechanic arts.
- (4) The act of March 4, 1907, amending the act of 1890 by increasing the yearly appropriation and extending the conditions for its use.

The benefits of the act of 1862 or of later acts in lieu of it are received by 48 States, and 53 institutions are thereby aided—1 in each of 43 States, 2 in Massachusetts and Missouri each, and 1 colored and 1 white institution in Mississippi, South Carolina, and Virginia each.

The appropriation under the acts of 1890 and 1907 is now fixed at \$50,000 to each of the 48 States and the 2 insular possessions, Porto Rico and Hawaii, and aids 69 institutions; 17 States maintain special colleges for colored students, which receive aid from this fund.

DEVELOPMENT OF LAND-GRANT COLLEGES.

The development of the institutions since the appropriation act of 1890 is shown in the following statistical table, beginning with the year 1891-92, since many States did not receive their funds under the act of 1890 till late in 1890-91:

DEGREES.

The degrees conferred by the institutions, not including the institutions exclusively for colored students, were: Bachelor or first degrees, 8,503; advanced degrees, 1,197; total, 9,700. Of the bachelor degrees, 1,903, or 22.4 per cent, were conferred on graduates of agricultural courses; 436, or 5.1 per cent, on graduates of home economics courses; and 1,959, or 23 per cent, on graduates of mechanic arts courses. Of the advanced degrees, 147, or 12.3 per cent, were for agricultural work; 17, or 1.4 per cent, for home economics; and 153, or 12.7 per cent, for mechanic arts.

PROPERTY.¹

Reports show an increase of \$23,362,791 in valuation of the property held by the 69 agricultural and mechanical colleges, making the total value \$160,298,353.

The total expenditure for building operations during the year was \$3,919,624.

INCOME.

The accompanying table shows the total income of all the agricultural and mechanical colleges for each year after the act of 1890 went into effect; also the appropriations for experiment stations, farmers' institutes, and extension work, where the funds were reported to this bureau separate from the regular college funds. An analysis of the total income for the last six years is given below.

LEGISLATIVE ACTS AND APPROPRIATIONS, 1914.

The following summary includes the regular appropriation bills in behalf of the colleges of agriculture and the mechanic arts; also special appropriation bills for new buildings and improvements:

Georgia.—Assents to the provisions of the Smith-Lever Act of Congress providing for cooperative agricultural extension work and names the State College of Agriculture to administer the provisions of the act. (Resolution No. 27, Aug. 14, 1914.)

Kentucky.—No appropriation bills were passed, the appropriation act of 1912 continuing in force.

Louisiana.—Accepts the provisions of the Smith-Lever Act of Congress and names the Louisiana State University and Agricultural and Mechanical College to administer the work (act No. 8, June 11, 1914); appropriates \$9,115.69 for interest on the Agricultural and Mechanical College fund for the year ending June 30, 1915; the same amount for the year ending June 30, 1916 (act No. 177, July 8, 1914).

Establishes a State tax of $1\frac{3}{20}$ mills on the dollar to pay interest on State indebtedness; the Agricultural and Mechanical College fund is part of this debt. (Act No. 281, July 9, 1914.)

Louisiana State University and Agricultural and Mechanical College: For support and maintenance for the year ending June 30, 1915, \$100,000; for agricultural teaching equipment to meet the requirements of the Smith-Lever Act, from revenues of 1914, \$15,000. (Act No. 177, July 8, 1914.)

Southern University: For support and maintenance for the year ending June 30, 1915, \$10,000; for the year ending June 30, 1916, \$10,000; for new buildings, \$25,000. (Act No. 177, July 8, 1914.)

Authorizes the sale of the property of Southern University in the parishes of Jefferson and Orleans, the college having been moved to Baton Rouge. (Act No. 207, July 9, 1914.)

Maryland.—Accepts the requirements of the Smith-Lever Act of Congress and designates the Maryland Agricultural College to administer the work. (Ch. 247, Apr. 1, 1914.)

Provides for the foreclosure on mortgage and purchase by the State of the Maryland Agricultural College. (Ch. 128, Mar. 20, 1914.)

Maryland Agricultural College: For maintenance for the fiscal year 1915, \$16,000; for the fiscal year 1916, \$16,000; for the experiment station for the fiscal year 1915, \$5,000; for the fiscal year 1916, \$5,000; for demonstration work for the fiscal year 1915, \$3,000; for the fiscal year 1916, \$3,000; for deficiency in interest for 1915, \$2,047.44; for 1916, \$2,047.44. (Ch. 721, par. 110, Apr. 16, 1914.)

Eastern Branch, Princess Anne Academy: For the fiscal year 1915, \$500; for fiscal year 1916, \$500. (Ch. 721, par. 113, Apr. 16, 1914.)

Massachusetts.—Accepts the provisions of the Smith-Lever Act of Congress and designates the Massachusetts Agricultural College to receive the grant. (Acts, ch. 721, June 29, 1914.)

The Massachusetts Agricultural College: For the fiscal year ending November 30, 1914, for general administration, \$30,000; for teaching equipment and general maintenance, \$85,000; for sundry improvements, \$8,000; for agricultural investigations and experiments, including the maintenance of the Massachusetts Agricultural Experiment Station, \$20,000; for theoretical and practical instruction, \$85,000; for short courses and extension work in agriculture, \$50,000; for the graduate school, \$2,000; for traveling and other expenses of the trustees, \$3,000; for the inspection of commercial feedstuffs, \$6,000; for prosecutions in regulating the use of utensils for testing the composition or value of milk and cream, \$500 (acts, ch. 68, Feb. 21, 1914); for the proportion of cost of a sewer, \$9,200 (acts, ch. 30, Feb. 9, 1914); for the building and equipping of a new agricultural building, in 1914, \$87,500, and in 1915, \$122,500 (resolves, ch. 82, May 22, 1914).

Massachusetts Institute of Technology: For the institute, \$100,000. (Acts, ch. 8, Jan. 31, 1914.)

Mississippi.—Mississippi Agricultural and Mechanical College: For support for 1914, \$97,500; for interest on agricultural land-scrip fund and interest on sale of college land donated by the United States Government for 1914, \$14,387.36; for support for 1915, \$97,500; providing that \$2,500 of the support fund for each year shall be used for student labor for practical working boys; for interest as above for 1915, \$14,387.36; for Young Men's Christian Association in 1914, \$500; for Young Men's Christian Association in 1915, \$500; for equipment of seed-testing laboratory and support of agronomy greenhouse for two years, \$1,000; for equipment and apparatus for the dairy, \$500; for necessary labor, medicine, and supplies for veterinary for two years, \$1,200; for help, supplies, and equipment in entomology for two years, \$1,000; for office equipment, models, records, files, etc., in animal husbandry, for two years, \$500; for equipment and supplies in botany for two years, \$450; for equipment, supplies, and extension in agricultural engineering for two years, \$2,000; for campus improvements for two years, \$1,000; for equipment, help, and extension in horticulture for two years, \$2,000; for equipment and supplies in electrical engineering for two years, \$1,000; for mainte-

CHAPTER V.

PROFESSIONAL SCHOOLS.

The number of professional schools reporting in 1914 was 542, as compared with 556 the preceding year. There was a loss of 3 schools of theology, 2 law schools, 8 schools of medicine, and 3 schools of pharmacy. There was an increase of 2 in the number of schools of dentistry, while the number of veterinary schools remained the same.

In 1914 there were 12,582 instructors, a decrease of 13, and 66,893 students, a net increase of 1,308 over 1913. Nearly all of this increase in student enrollment was in the schools of dentistry. There were 15,686 graduates in 1914, as compared with 14,252 the preceding year. Of the 66,873 students, 11,173 had acquired college degrees prior to entering professional schools.

The value of property owned by the professional schools was \$66,240,107, as compared with \$62,841,843 in 1913. The endowment funds aggregated \$64,686,364 in 1914, having increased from \$54,176,520 as reported the preceding year. Benefactions for 1914 reached the large sum of \$8,936,359, as compared with \$3,759,059 for the year 1913. These benefactions bring the total receipts for 1914 up to \$19,608,761, an increase of \$5,159,139 over the preceding year.

CHAPTER VI.

PUBLIC AND PRIVATE NORMAL SCHOOLS.

This chapter presents the statistics of 281 public and private normal schools reporting to this office for the year ended June, 1914. This number is 3 less than the number reported for 1913. On page 350 will be found the names of the institutions added or dropped from the list of public normal schools and private normal schools.

In the regular training courses for teachers in the 281 normal schools there were enrolled 95,286, as compared with 94,455 reported in 1913, showing an increase of 831 students. Of the 95,286 students reported, there were 2,215 preparing to be kindergarten teachers. In addition to the students in training courses for teachers in these public and private normal schools, 21,076 students were reported as pursuing such courses in 1,051 public high schools, and 6,084 in 288 private high schools and academies. The following table makes a comparison of the number of students for the past four years:

¹ Statistics not called for.

The number of normal graduates reported from the 281 public and private normal schools for 1914 was 20,658, or 22 per cent of the number of normal students in these institutions.

The following synopsis compares the progress of public and private normal schools in the past 23 years:

CHAPTER VII.

SUMMER SCHOOLS IN 1914.

A complete directory of the summer schools reporting sessions held in 1914 is included in the educational directory for 1914-15 published by the Bureau of Education (Bulletin No. 43, 1914). The directory gives the name and location of each school, the name of the director or principal, and the probable date of the session of 1915.

The number of summer schools reporting sessions in 1914 was 704. Of these, 53 were regular sessions of universities, 40 of colleges, 73 of normal schools, 27 of other institutions, while 511 were independent schools.

The number of students enrolled was 218,794, which was 37,506 more than the number enrolled in 1913.

The average length of session was 7.2 weeks—the same as in the two preceding years. Only 31 schools held sessions of less than 4 weeks; 356 held sessions of 4 or 6 weeks; 143 of 7 or 8 weeks; 99 of 9 or 10 weeks; 46 of 11 or 12 weeks. The remaining 29 schools were in session from 13 to 22 weeks.

CHAPTER VIII.

PUBLIC AND PRIVATE HIGH SCHOOLS.

The aggregate number of students in 13,714 public and private high schools in 1914 was 1,373,661, an increase of 90,652 over the preceding year. This is an increase of more than 100 per cent in enrollment since 1902.

The proportion of students completing the high-school course continues to increase from year to year. In 1914 the fourth-year students numbered 194,704, or 14.27 per cent of the total enrollment. In 1907 the percentage of fourth-year students was 12.25.

Of the 11,515 public high schools, 8,275 have four-year courses and an enrollment of 1,126,456 students. This number is 92.42 per cent of the total public high-school enrollment in 1914, as compared with 88.07 per cent in 1909.

The approximate cost of the public high schools in 1914 was \$69,000,000. This estimate is based upon the returns from 2,743 public high schools summarized in Table 14. In this tabulation it was necessary to eliminate the financial statements of all schools in which high-school cost was not clearly separated from elementary-school expenditure. The 2,743 public high schools represented in Table 14 had 335,309 students and an aggregate income of \$19,117,841, indicating a per capita cost of \$57.02.

DENOMINATIONAL AND NONSECTARIAN SCHOOLS.

Of the 2,199 private high schools and academies reporting in 1914, there were 1,489 under the control of religious denominations. These schools had 8,762 teachers and 101,329 students of high-school grade. The 710 nonsectarian institutions had 5,128 teachers and 53,528 students in the high-school grades. Table 23, in four parts, gives by States the enrollment in the schools of each of the 12 denominations having more than 1,000 high-school students. The following synopsis shows the number of high schools and academies controlled by each of 28 denominations, the teaching force, and the high-school enrollment:

CHAPTER IX.

COMMERCIAL AND BUSINESS SCHOOLS.

The Bureau of Education has the names of more than 1,300 independent commercial and business schools. There are hundreds of other business schools which are departments of normal schools, private high schools, and other institutions. Only 704 of the independent business schools responded to this bureau's request for statistical information in 1914. This was 86 more than the number reporting the preceding year.

There were 168,063 students in the 704 business schools reporting, an increase of 7,506 over the preceding year. In 723 private high schools there were 17,457 students in business courses, while 2,191 public high schools had 161,250 students in such courses.

Students in commercial courses, 1913 and 1914.

The number of students in business courses in public and private normal schools and higher institutions has not been reported for a number of years. These and the enrollment in the hundreds of business schools not reporting would increase the total to a figure far above 350,000.

The following synopsis relates exclusively to the statistics of the 704 commercial and business schools reporting to this bureau:

CHAPTER X.

STATISTICS OF SCHOOLS FOR NEGROES.

This chapter presents the statistics of 360 schools for negroes, 161 being public high schools. The statistics of colleges, normal schools, industrial schools, and public and private high schools for negroes will be found incorporated with other schools of similar grades in the chapters of this volume.

For a number of years there has been a steady growth in the public high schools for negro students. In 1914 twenty-two States and the District of Columbia reported 161 of these public high schools, with 338 teachers and 11,770 students. The summarized statistics of these schools will be found in Table 1 on the next page, while the following synopsis shows the growth since 1910:

Comparative statistics of public high schools for negroes.

	1910	1911	1912	1913	1914
Schools	141	150	159	156	161
Teachers	473	513	597	566	638
Students	8,251	9,641	10,877	10,594	11,770

These schools had 1,514 students in manual training, 484 in training courses for teachers, 559 in agricultural courses, and 3,456 in courses in domestic economy. There were 1,814 graduates from 139 of these public high schools.

Tables 2 and 3 summarize the statistics of the 199 private and denominational schools for negroes, Table 4 giving the information in detail. These schools had 2,822 teachers and 54,271 pupils, 30,808 of these being in elementary grades. There were 20,037 in high school and normal grades and 3,428 in higher education. Of the total enrollment, 18,237 received industrial training in some form.

Property to the value of \$16,327,569 is owned by 177 of these schools, and 145 of them report receipts for the year aggregating \$2,912,574.

CHAPTER XI.

STATE INDUSTRIAL SCHOOLS.

There were 112 State industrial schools reporting to this bureau in 1914. These schools employed 1,052 teachers, 3,085 assistants (not teachers), and enrolled 54,798 inmates—43,333 boys and 11,465 girls. The average enrollment for the year was 32,727, as reported by 105 of the 112 schools. The boys and girls committed during the year numbered 21,665. Of these, 2,635 could neither read nor write. Of the 22,068 discharged, 20,096 could both read and write.

Some of these schools are not, strictly speaking, State institutions, but are controlled by private corporations and associations. They receive children committed by public authority, however, and receive public appropriations to care for these children. The following institutions are of this class:

Delaware Industrial School for Girls, Wilmington, Del.
 Junior State School, Athens, Ga.
 Chicago Home for Girls, Chicago, Ill.
 House of the Good Shepherd, Chicago, Ill.
 Convent of the Good Shepherd, Sioux City, Iowa.
 St. Elizabeth's Home for Colored Children, Baltimore, Md.
 St. James's Home for Boys, Baltimore, Md.
 St. Mary's Industrial School for Boys of the City of Baltimore, Baltimore, Md.
 Plummer Farm School, Salem, Mass.
 House of the Good Shepherd, Detroit, Mich.
 Sisters of the Good Shepherd, Grand Rapids, Mich.
 Hudson County Catholic Protectory, Arlington, N. J.
 New York Juvenile Asylum, Chauncey, N. Y.
 House of the Good Shepherd, New York, N. Y.
 St. Vincent's Industrial School, Utica, N. Y.
 Glen Mills Schools, Glen Mills, Pa.
 Wisconsin Home and Farm School, Dousman, Wis.

CHAPTER XII.

SCHOOLS FOR THE BLIND AND THE DEAF.

Tables 1 to 6 present the statistics of the 62 public schools for the blind reporting to this bureau in 1914. These schools employed 665 teachers, enrolled 4,971 pupils, and owned property valued at \$15,224,693. The aggregate expenditure for these schools was \$2,563,173, including \$771,883 expended for buildings and improvements. The per capita cost of instruction and maintenance was a little more than \$360, an increase of \$32 per capita over the preceding year.

Tables 7 to 15 present the statistics of 151 schools for the deaf. Of these schools, 68 were State schools, 65 were public day schools, and 18 were private schools. These schools employed 1,689 teachers and enrolled 13,859 pupils. The 68 State schools owned property valued at \$19,922,603, and expended \$3,777,162, of which \$480,539 was expended for buildings and improvements. The per capita cost of instruction and maintenance in State schools for the deaf was nearly \$291.

Schools reported to this bureau, but without complete statistical returns.

School in Lip Reading for the Deaf, Deland, Fla.

Müller-Walle Training School, Boston, Mass.

Joplin Oral Day School for the Deaf, Joplin, Mo.

Kansas City Day School for the Deaf, Kansas City, Mo.

Central Institute, Vandeventer Avenue and Westminster Place, St. Louis, Mo.

The Davidson School of Individual Instruction, Tamworth, N. H.

New York School for Hard of Hearing, 156 Fifth Avenue, New York, N. Y.

Müller-Walle School of Lip Reading for Adult Deaf, Walnut and Seventeenth Streets, Philadelphia, Pa.

Schools for stammerers are not properly considered with schools for the deaf, but there are objections to placing them in the list of schools for nervous and backward children. The following schools have been reported to this bureau, but full information concerning them is not at hand:

The Pacific School for Stammerers, 1918 Grove Street, Oakland, Cal.

The Bogue Institute for Stammerers, Indianapolis, Ind.

Boston Stammerers' Institute and Training School, 36 Bromfield Street, Boston, Mass.

Lewis School for Stammerers, 14 Adelaide Street, Detroit, Mich.

Reed School for Nervous and Backward Children, 384 Hubbard Avenue, Detroit, Mich.

The Duke School for Stammerers, 1800 Third Avenue, South, Minneapolis, Minn.
Public School for Stammerers, Minneapolis, Minn.

The Neidlinger Voice School for Delayed and Imperfect Speech, Mystic, Conn. (May to November); East Orange, N. J. (November to May.)

Bryant School for Stammerers, 62 West Fortieth Street, New York, N. Y.

Public School Classes for Stammerers, Lispers, etc., New York, N. Y.

The Lamb School for Stammerers, 1252 Franklin Street, Pittsburgh, Pa.

Janesville School for Children with Defective Speech, Janesville, Wis.

Northwestern School for Stammerers, Milwaukee, Wis.

Senator Moses E. Clapp, of Minnesota, has introduced in the Senate of the United States "A bill to create a Bureau for the Deaf and Dumb in the Department of Labor" [S. 4722]. This bill provides for a chief of said bureau whose duty shall be to study the industrial, social, and educational condition of the deaf and dumb throughout the United States, and to seek to promote their welfare in all lines.

In the January (1915) number of the *American Annals of the Deaf*, Mr. Edward Allen Fay, author of "Progress in the Education of the Deaf" (vol. 1, ch. 21, *Educ. Rept.*, 1913), makes the following correction:

Priority in the use of the Montessori method.—The writer of an article entitled "Progress in Education of the Deaf" published in the Report of the Commissioner of Education for the year ending June 30, 1913, erred in saying that Mrs. Edwin G. Hurd, of the Rhode Island Institute, "was the first actually to apply the Montessori method to the education of the deaf." Mrs. Hurd, as the article states, began the use of this method in January, 1913. Mrs. J. Scott Anderson, directress of Torresdale House, writes in the *Volta Review* for August, 1914, that she "had a Montessori class composed entirely of deaf children as far back as February, 1912;" and Mr. Ignatius Bjorlee, of the New York Institution, informs us that "in the summer of 1912 full equipments for the Montessori work were procured for the New York Institution, and teachers with special training were put in charge."

CHAPTER XIII.

SCHOOLS FOR THE FEEBLE-MINDED.

There were 38 State schools and 25 private schools for the feeble-minded which reported to this bureau in 1914. Public day schools for subnormal children were reported in 54 cities. Detailed statistics of these schools appear in Tables 6, 7, and 8. Special institutions for nervous children may be found in Table 9.
